

Design System — Best Invest Properties

Date: 25 September 2026

Source: the approved prototype

This is the visual style of the approved prototype: colours, font, shapes and the main interface elements. Every value is taken directly from the prototype.

1. The look in short

- **Light and calm.** Every page sits on a very light blue background with white cards.
- **Blue for everything functional.** Text, links and buttons use shades of deep blue.
- **One warm accent — gold.** It marks the active menu item, key developer actions, the "TOP INVESTMENT" badge and the logo.
- **One font — Archivo.** Headings are bold and in capital letters.
- **Soft, rounded shapes.** Buttons are pill-shaped, cards have rounded corners and a soft blue shadow.
- **Mostly light, with a few dark accents.** The landing hero and some screen headers use deep navy; everything else is light, including the admin area.

2. Colours

Main colours

	Name	HEX	Used for
	Deep navy	#0F3A60	main text, dark headers, text on gold buttons
	Dark blue	#174B67	page titles, links
	Slate	#36566B	paragraph text
	Muted blue-grey	#566E80	labels, dates, secondary text
	Primary blue	#205A87	main buttons, key figures, active links
	Bright blue	#087CB8	highlighted buttons, e.g. "Open full review"
	Gold	#DDB45E	the accent: active menu item, developer actions, badges, logo

Backgrounds

	Name	HEX	Used for
	Page background	#F7FCFF	the background of every page
	White	#FFFFFF	cards, tables, panels
	Panel blue	#EAF2F8	side navigation in the developer portal and admin area
	Field blue	#F0F7FC	form fields
	Gold wash	#F8EFDC	"under review" and "awaiting approval" areas

Status colours

	State	HEX	Used for
	Success	#2F7D63	approved, checked, introduction made
	Success background	#E4EFE8	"Available", "Approved" chips
	Error	#B3453D	errors, Reject, the GAP tag
	Error — dark	#8E362F	confirm button for a destructive action
	Error background	#FCF5F4	"Verification unsuccessful" block

The prototype also uses a number of close shades of these colours for small details (borders, the gold gradient in the logo, secondary labels). They are listed in the technical version of this document.

Borders and shadows are tinted with blue rather than grey — this is what keeps the light pages from looking grey.

3. Font

Archivo is the only font, in four weights: regular (400), medium (500), semi-bold (600) and bold (700).

Text	Size	Style
Landing hero title	34–54 px on desktop (grows with the screen), 31 px on mobile	bold, capital letters
Page title	28–34 px	bold, capital letters
Card and panel titles	20–23 px	semi-bold
Paragraph text	16.5 px	regular
Buttons, tables, labels	15.5 px — the base interface size	regular or semi-bold
Small notes	13–14 px	regular
Section labels	12 px	capital letters, widely spaced

All figures — prices, yields, scores — use equal-width digits so columns line up.

4. Shapes

Element	Corners
Buttons, filter chips, tabs	fully rounded (pill)
Cards and panels	16 px
Form fields	10 px
Status chips	4 px

Cards are white, with a thin blue border and a soft blue shadow.

5. Main elements

Buttons

Button	Look	Used for
Primary	blue #205A87 , white text	the main action on a screen
Bright	bright blue #087CB8 , white text	highlighted actions, e.g. "Open full review"
Gold	gold #DDB45E , deep navy text	developer actions and "Open review"
Secondary	white with a thin blue outline	secondary actions
Destructive	red outline, red text	Reject, Decline, Suspend
Confirm destructive	dark red #8E362F , white text	the final "yes" for a destructive action

All buttons are pill-shaped. There are no square buttons.

Status chips

Small labels in capital letters, e.g. AVAILABLE , AWAITING APPROVAL , DECLINED .

Meaning	Background	Text
Available / approved	light green	blue or green
Pending / awaiting	light gold	dark blue
Rejected / risk	light red	red
Neutral	light blue-grey	slate

A status is never shown by colour alone — the chip always has text.

Forms

- Every field is labelled **Required** or **Optional**.
- An error appears in red directly under the field, and the field border turns red.

Confirmation window

Used before every important action. It has a title, a short explanation, an optional note, an optional required "reason" field, and **Cancel** / **Confirm** buttons. The confirm button is blue for normal actions and dark red for destructive ones.

Notification (toast)

A dark navy bar at the bottom of the screen with a short message, e.g. "Saved to your shortlist". It disappears after about 4 seconds, or on click.

6. Desktop and mobile

The prototype has two layouts — desktop and mobile. On mobile the structure changes, not just the sizes:

Element	Desktop	Mobile
Main navigation	links across the top	burger menu
Portal and admin side navigation	a 190 px column on the left, gold bar on the active item	a horizontal scrolling strip at the top
Catalogue filters	a column on the left	a slide-out panel showing how many filters are selected
"Top 5" list	a column on the right	moves above the results
Legal page contents	a column on the left	a horizontal strip
Tables	full width	scroll sideways
Landing hero title	34-54 px	31 px

The exact screen width at which the site switches to the mobile layout is set during development.

7. Accessibility

The main colour combinations meet the international accessibility standard (WCAG 2.2, level AA — a contrast of at least 4.5 : 1):

Text on background	Contrast
Deep navy on the page background	11.3 : 1
Slate paragraph text on white	7.8 : 1
White on primary blue	7.3 : 1
Deep navy on gold	6.0 : 1
White on bright blue	4.6 : 1

Also:

- the light placeholder colour in empty fields is used only as a placeholder, never for real text;
- a status is always shown with text, not colour alone;
- the direction of the "Risk & Investor Protection" score is always explained in words (more points = lower risk);
- every button and tappable element is at least 44 × 44 px.
